Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the **Final Office Action** for application number 09/993,362 Zero Looseness Fastener for Linkage Assembly. Claims 1, 2 and 4-25 are pending. This **Final Office Action** is in response to applicant's reply dated 3/15/04. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 1, 2 and 4-25 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 5738475 to Chaban.

The patent to Chaban discloses a vehicle seat mounting assembly having at least one movable seat track (52), a linkage assembly having a first link (82) having a first external surface and a thickness, a first internal surface, and a first aperture (118) extending between the first external surface and the first internal surface, a second link (88) having a second external surface and a second thickness, a second internal surface, and a second aperture (118) extending between the second external surface and the second internal surface, a single piece fastener (92) having a head portion (128) and a cylindrical body portion (134) extending therefrom and terminating at a distal end (122) opposite the head portion. Chaban teaches a hollow rivet with a central bore having an internal diameter, wherein the central bore extends for a length less than the total length of the body portion wherein the central bore is open at the end of the

Art Unit: 3632

body portion opposite the head portion and is closed toward the body portion and wherein the body portion is expanded outwardly within the apertures to engage the links. Chaban also shows wherein the body portion of the fastener extends through the first and second apertures and that the fastener has a length that is greater than the sum of the first thickness and the second thickness of the links such that when the internal face of the first link is placed against the internal face of the second link and the body portion is inserted through the first and second links, a segment of the body portion extends beyond the links, wherein the distal end of the body portion is plastically deformed to form a lip engaging an external surface of the second link and allows rotational movement and not linear movement wherein the lip portion locks the fastener to one of the links to prevent relative rotational movement while allowing the other link to rotate.

Response to Arguments

Applicant's arguments with respect to claims 1,2 and 4-25 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action

Art Unit: 3632

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
